

- No. 1 西 晋之介 (広島大学)
Quantitative detection of piscine nodavirus in fish-rearing seawater
- No. 2 Indah Istiqomah (広島大学)
Vaccine development for atypical *Edwardsiella tarda* infection in red seabream *Pagrus major*
- No. 3 How Kah Hui (東京大学)
Dynamics and distribution properties of theronts of parasitic ciliate *Cryptocaryon irritans* causing marine white spot disease in aquaria
- No. 4 松浦 雄太 (日本大学)
Exploring the serine protease involved in cell-mediated immunity in fish using synthetic substrates
- No. 5 深野 華子 (日本獣医生命科学大学)
Characterization of a rapidly growing nontuberculous mycobacteria isolated from farmed thread-sail filefish *Stephanolepis cirrhifer* in Japan.
- No. 6 小松 真未 (日本大学)
Identification of genes induced by double-strand RNA in kuruma shrimp *Marsupenaeus japonicas* hemocytes.
- No. 7 野知里 優希 (東京海洋大学)
Identification of an insertion sequence related to deletion/insertion of the potent toxin genes of acute hepatopancreatic necrosis disease (AHPND) in *Vibrio parahaemolyticus*
- No. 8 Sasiwipa Tinwongger (東京海洋大学)
Characterization of virulence factor of AHPND *Vibrio parahaemolyticus* which is the causative agent of shrimp disease
- No. 9 竹内 久登 (日本大学)
Epidemiological survey of pathogenic bacteria among ayu and other feral fishes in a river
